Design Pattern	:	MVC, Front Controller, Singleton
Frameworks	:	Spring MVC, Rest Web Service, Spring boot, cache Framework, JUnit
Scripting Languages	:	HTML, CSS and JavaScript
Build Tool	:	Maven 3.x
Version Control	:	SVN Repository System, Git Repository
Cloud	:	Amazon Web Services
Operating System	:	Ubuntu, Centos, Windows 7/8/10
Database	:	MongoDB, Elastic search, MapR DB, Postgresql
Messaging Service	:	Active MQ,> Rabbit MQ
Security	:	Spring Security, Jwt

Qualification:

- **Masters in Computer Applications (MCA)** from Lovely Professional University **01-08-2015 to 20-05-2017**
- Bachelors in Computer Applications from CCS University Meerut **01-08-2012 to 15-06-2015**
- Senior Secondary from Uttar Pradesh Board (Allahabad) **20-04-2011 to 30-03-2012**
- Matriculation from Uttar Pradesh Board (Allahabad) **15-04-2009 to 05-04-2010**

Professional Experience:

HCL Technologies (06-01-2021 to Present)

Project: Face Pay

India Client: **NEC America**

Domain: E - Payment Solution

Technology & Tools: **Java SE 8, Spring boot, Swagger2**

Database: MySql

Designated: Java Developer

Description:

FacePay is a biometric-based payment solution built on top of the NDP biometric platform. It deals with payment gateways (like Foudry) for providing payment features. It provides an abstraction to users for using biometrics and payment features at a single place. The user can get enrolled through mobile devices and pay on any kiosk with face identification.

Roles and Responsibilities:

- Develop technical design for application development.
- Develop application backend code using Java and Spring
- Develop and execute unit test plans.
- Created Daily and Weekly Test status reports

Project: DID (Decentralized Identifier)

India Client: NEC America

Domain: E - Verification Service

Technology & Tools: **Java SE 8, Spring boot, Swagger2**

Database: MySQL

Designated: Java Developer

Description:

A Verification Service process that validates a person's identification. It deals with the verification service (AAMVA). The user can get enrolled through mobile devices and scan government documents like (ID, DL), etc.

Roles and Responsibilities:

- Develop technical design for application development.
- Develop application backend code using Java and Spring
- Develop and execute unit test plans.
- Created Daily and Weekly Test status reports
- Coordination with clients for understanding project requirements and providing the solution as per their requirements

Tusthi Enterprise (01-02-2019 to 31-12-2019)

Project: An Internal project of the Government.

Client: Ministry of Defence (Government of India)

Domain: E - Data Analysis

Technology & Tools: **Java SE 8, Spring boot, MapR, ElasticSearch, Swagger2**

Database: MapR, **ElasticSearch (NO SQL), MySQL**

Designated: Java Developer

Description:

This Project is an initiative of Government of India. The objective of this project is to collect data from various sources (external data) at one location and then later analyze the data for generating relevant reports and search.

Roles and Responsibilities:

- Develop technical design for application development.
- Develop application backend code using MapR, Kibana & Elastic Search
- Develop and execute unit test plans.
- Created Daily and Weekly Test status reports

Maven Workforce, Noida (09-04-2018 to 29-01-2019)

Project: Job Portal

Client: Vasitum

Domain: Job Search Engine

Technology: **Java SE 8, Spring Boot, Aws , Agolia Search Engine,Swagger2**

Database: Mongo DB(NOSQL)

Cloud : **Aws**(amazon web services)

Designated: Java Developer

Description

:

Vasitum Tech startup focuses on solving the challenges of recruiters and job seekers alike. Vasitum is an AI-enabled career platform that automates the cumbersome and monotonous activities of the recruitment process. Paired with the smart matching of jobs and talent, automated real-time screening and communication, Vasitum is a modern HR powerhouse to accelerate recruitment

Roles & Responsibilities

- **Developed Backend APIs using Java, Spring Boot, MongoDB and AWS for the application and Chabot**
- Client Interaction, Gathering Data, Documentation and Knowledge transfer to technical leads
- Develop technical design for application development.
- Develop application Backend code using Java SE 7, Spring Boot 3.0 & Mongo DB
- **UAT** Execution with end Users
- Created Daily and Weekly Test status reports

Oakheads Solutions Pvt Ltd, Noida (10-06-2017 to 04-04-2018)

Training & Project : Location Based Deal

Role : Java Developer

Team Size : 10

Domain : Ecommerce

Technologies used : Java SE 7, Spring MVC Framework 3.2,

Database : MongoDB(NO SQL)

Description:

This Project is location based application in which user gets top best deals from nearest shops

Roles and Responsibilities:

- Developed Backend API for Android and IOS
- Developed restful web service implementation in Java using maven and Spring to support different web platforms
- Developed Backend modules using Mongo DB as No SQL Database
- UAT Execution with end Users
- Created Daily and Weekly Test status reports
