Profile

Having around 7 Years of experience in software testing my work ranges from implementing testing processes to successful delivery of the projects.

Experience

Sr. Member Technical Staff - SDET, Grey Orange Robotics — 2016-Present
GreyOrange is a multinational firm that designs, manufactures and deploys advanced robotics systems for automation at warehouses, distribution and fulfilment centres.

- Created tools for client integration
- Created Automation Framework using Django
- Automated Rest APIs using Python and Robot Framework
- Automated Web UI using Selenium with Python
- Test Case Management using TestLink
- Database verification using Postgres
- Defect management Using JIRA

SDET, nerabuy.com(Formerly known as Groupon India) — 2015 - 2016
Nearbuy is India's first hyperlocal online platform that enables customers and local merchants to discover and engage with each other. We at Nearbuy, work hard to bring your world, closer to you. Whether it's fine dining, relaxing at the top spas, or just discovering your city intimately, Nearbuy makes it happen for you.

- Worked on an internal tool which was used by the Sales team to input deals/ offers visible on the customer web (nearbuy.com).
- API Testing using Postman and Swagger
- Data Verification using MongoDB
- Automation Using Selenium Web Driver
- Appium for Mobile App (POC)
- UAT Support
- Defect management Using JIRA
- Automated Rest APIs using Python and Robot Framework
- Automated Web UI using Selenium with Python
- Test Case Management using TestLink
- Database verification using Postgres
- Defect management Using JIRA

Associate QA, Sapient Consulting — Jan 2013 - 2015
My project as Sapient was a web application based on Adobe CQ. It was used by the client for managing their mutual funds for their investors, showing the company's upcoming and past events and to showcase articles published by their authors.

- Test Script writing and Execution
- Adobe CQ5 content management system
- Data Verification using Sybase Database
- UAT and Integration Testing
- Defect management Using JIRA
